Key words. HII regions – radiation mechanisms: general – radio continuum: ISM – submillimeter: ISM – errata, addenda

There is a typographical error in the unit of the τ_{250} column of Table 3 of [Planck Collaboration XVI \(2014\)](#), resulting in all τ_{250} values listed being a factor of 10 smaller than they should be.

The values have been multiplied by 10^4 and *not* 10^5 as listed in the previously published version. All the values relating to τ_{250} in the main body of text and figures remain correct.
